The Safest Investments

Are those that do not fluctuate during dis-turbed conditions of the money or atsak mar-kets. First deed of trust notes (first mort-ages), well secured on real estate in the District of Columbia, constitute "gitt-edge" investments. They do not depend upon the financial responsibility of individuals or cor-porations for their stability, and are exemp-trom taxation as personal property. We can supply such investments in amounts from Louis upward Send for booklet, "Concerning Loans and Investments."

Is This the Kind of Bank You Want to Bank With?

The Munsey Trust Company has a capital of \$1,000,000. It started right, with its capital fully paid in before it opened its doors for business. Capital enough to make it as solid as the "Rock of Gibraltar."
